Grain size distribution curve showing Percent Finer by Weight versus Grain Size in Millimeters. The curve is plotted on a semi-logarithmic scale. The y-axis represents Percent Finer by Weight (0 to 100), and the x-axis represents Grain Size in Millimeters (logarithmic scale from 100 to 0.001). The curve shows a high percentage of fine material, with approximately 98% finer than 2.0 mm and 13% finer than 0.075 mm.
