

A photograph showing a long, light-colored sediment core sample lying on a dark, textured surface. A measuring tape is placed vertically along the left side of the core, with markings visible from 1 to 10 feet. The core is divided into segments by horizontal lines. To the right of the core, a white label with a red border contains the following text: "MARTIN CO. OFFSHORE INVEST.", "VB-MCSP07- 19", and "DEPTH: 0-20'". In the upper right corner, several metal rods or pipes are visible.
